

# The Sun's Rotation

J. Jayaraiah  
M. H. Gokhale

NOVA

# **THE SUN'S ROTATION**

**J. JAVARAIAH AND M. K. GOKHALE**  
**EDITORS**

**Nova Science Publishers, Inc.**  
*New York*

**Senior Editors:** Susan Boriootti and Donna Dennis  
**Coordinating Editor:** Tatiana Shohov  
**Office Manager:** Annette Hellinger  
**Graphics:** Wanda Serrano  
**Editorial Production:** Jennifer Vogt, Matthew Kozlowski, and Maya Columbus  
**Circulation:** Ave Maria Gonzalez, Indah Becker and Vladimir Klestov  
**Communications and Acquisitions:** Serge P. Shohov  
**Marketing:** Cathy DeGregory

<b>List of Figures</b>	<b>ix</b>
<b>List of Tables</b>	<b>xiii</b>
<b>Preface</b>	<b>xv</b>
<b>Acknowledgments</b>	<b>xix</b>
<b>1 Sun's Structure and Solar Phenomena</b>	<b>1</b>
By M. H. GOKHALE and J. JAVARAIAH	
1.1 Importance of Solar Rotation Studies in Astrophysics . . . . .	1
1.2 A Brief History of Sun's Rotation Studies . . . . .	2
1.3 Sun's Interior . . . . .	3
1.4 Sun's Atmosphere . . . . .	5
1.5 Sun's Photosphere and Chromosphere . . . . .	9
1.6 Sun's Magnetic Field . . . . .	9
1.7 Magnetic Structures in Solar Activity . . . . .	11
1.7.1 Sunspots . . . . .	11
1.7.2 Prominences . . . . .	13
1.7.3 Plages and Other Structures . . . . .	13
1.8 Solar Wind and Interplanetary Magnetic Field . . . . .	13
1.9 Explosive Phenomena in Solar Atmosphere . . . . .	15
1.9.1 Flares . . . . .	15
1.9.2 Prominence Eruptions . . . . .	17
1.9.3 Coronal Mass Ejections . . . . .	17
1.9.4 Radio Bursts . . . . .	17
1.9.5 Interplanetary Shocks . . . . .	17
1.10 Solar Cycle . . . . .	18
1.10.1 Sunspot Cycle . . . . .	18
1.10.2 Solar Magnetic Cycle . . . . .	20
1.11 Importance of Studies of Solar Rotation in Space Physics . . . . .	20

1.11.1 Terrestrial Effects of Solar Activity . . . . .	20
1.11.2 Effects of Solar Activity in Interplanetary Space . . . . .	22
1.11.3 Importance of Rotation Studies . . . . .	22
1.12 Solar Rotation and Solar System Dynamics . . . . .	22
<b>2 Mean Rotation of Sun's Outer Layers</b>	<b>23</b>
By J. JAVARAIAH and R. W. KOMM	
2.1 Introduction . . . . .	23
2.2 Reference System . . . . .	24
2.3 Parameterization . . . . .	25
2.4 Doppler Measurements . . . . .	26
2.4.1 Early Measurements . . . . .	27
2.4.2 Modern Measurements . . . . .	27
2.4.3 A Brief Description of the Error Sources in Doppler Measurements . . . . .	28
2.5 Tracer Measurements . . . . .	30
2.5.1 Methods of Feature Tracking . . . . .	31
2.5.2 Correlation Technique . . . . .	32
2.5.3 Some Important Error Sources in the Tracer Method . . . . .	32
2.6 Resulting Rotation Rates . . . . .	33
2.6.1 Rotation Rates of Surface Plasma From Doppler Measurements	33
2.6.2 Rotation Rates of Surface Magnetic Regions . . . . .	34
2.6.3 Rotation Rates of Polar Latitudes . . . . .	40
2.6.4 Rotation of Chromospheric and Coronal Structures . . . . .	40
2.6.5 North-South Asymmetry of the Rotation Rate . . . . .	42
2.7 Summary and Discussion . . . . .	45
<b>3 Time Dependence of the Rotation of Sun's Outer Layers</b>	<b>51</b>
By R. W. KOMM and J. JAVARAIAH	
3.1 Introduction . . . . .	51
3.2 Torsional Oscillations . . . . .	53
3.2.1 Doppler Observations . . . . .	53
3.2.2 Magnetogram Observations . . . . .	57
3.2.3 Relation to Meridional Flow . . . . .	61
3.2.4 Sunspot Observations . . . . .	63
3.2.5 Other Tracer Observations . . . . .	66
3.2.6 Theoretical Understanding . . . . .	69
3.3 Variations on Short Time Scales . . . . .	72
3.4 Variations on Long Time Scales . . . . .	75
3.5 Summary . . . . .	77

<b>4 Rotation Rate in the Solar Interior: Helioseismic Studies</b>	<b>81</b>
By H. M. ANTIA	
4.1 Introduction . . . . .	81
4.2 Solar Oscillations Frequencies and Rotational Splittings . . . . .	83
4.3 Inversion Techniques . . . . .	87
4.3.1 Regularized Least Squares Technique . . . . .	88
4.3.2 Subtractive Optimally Localized Averages Technique . . . . .	90
4.4 Rotation Rate in the Solar Interior . . . . .	92
4.5 The Tachocline . . . . .	98
4.6 The Zonal Flow and Time Variation . . . . .	100
4.7 Summary . . . . .	105
<b>5 Theoretical Studies of Sun's Rotation</b>	<b>109</b>
By M. H. GOKHALE and J. JAVARAIH	
5.1 Theoretical Questions Associated With Solar Rotation Studies . . . . .	109
5.2 Rotation of Stars . . . . .	110
5.2.1 Spin-Down of Sun-Like Stars . . . . .	111
5.2.2 Relation of Rotation to the Structure and Meridional Flows in Stars . . . . .	112
5.3 Modeling of Differential Rotation in the Convective Envelope . . . . .	113
5.3.1 Based on Meridional Circulation . . . . .	113
5.3.2 Based on Anisotropic Turbulent Viscosity . . . . .	113
5.4 Modeling of Uniform Rotation in the Radiative Core . . . . .	114
5.5 Modeling of the Tachocline . . . . .	114
5.6 Modeling of the Solar Spin-down . . . . .	117
5.7 Modeling of the Solar Magnetic Cycle . . . . .	118
5.7.1 Multi-Periodic Nature of the Solar Cycle . . . . .	118
5.7.2 Turbulent Dynamo Models . . . . .	121
5.7.3 Oscillator Models . . . . .	122
5.7.4 Solar Magnetic Cycle as a Superposition of Global Oscillations	123
5.8 Modeling of Torsional Oscillations . . . . .	124
5.9 Depths of Origin and Rising Rates of Toroidal Magnetic Fields Struc- tures . . . . .	124
5.9.1 Definition of 'Anchoring Depth' of a Magnetic Structure . . .	124
5.9.2 Need to Determine Dependence of Rotation Rates of Tracers on Their Life Span and age . . . . .	125
5.10 Dependence of Rotation Rate of Sunspot Groups on Life Span . . .	125
5.11 Estimation of the 'Initial' Anchoring Location of Magnetic Structures of Sunspot Groups . . . . .	127

5.12 Rising-Rate of the 'Anchoring Depth' of Magnetic Structures of Sunspot Groups . . . . .	131
5.12.1 Confirmation From Enlarged Data set . . . . .	134
5.12.2 Non-Dependence on the 'Type of Spot Groups' . . . . .	134
5.13 Combined Inference From Area-Lifetime, $r_o - \tau$ and $r_a - t$ Relations . . . . .	134
5.14 Rising Loops of Thin Magnetic Flux Tubes : Observations and Theory . . . . .	138
5.14.1 Dynamical Models of Rising of the Thin Magnetic Flux Tubes . . . . .	138
5.14.2 Effect of Rise on Angular Velocity of Rotation . . . . .	139
5.14.3 Effects of Initial Conditions on the Rise of a Thin Flux Tube . . . . .	139
5.15 Residual Rotation Rates and Tilt Angles of 'Magnetic Plages' . . . . .	142
5.16 Summary : Inadequacy of the Present Models . . . . .	143
<b>Bibliography</b>	<b>145</b>
<b>Index</b>	<b>164</b>
